

# RI TRANSPARENCY REPORT

2020

Keva

# About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the PRI website, ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the reporting period specified above. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

## PRI disclaimer

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

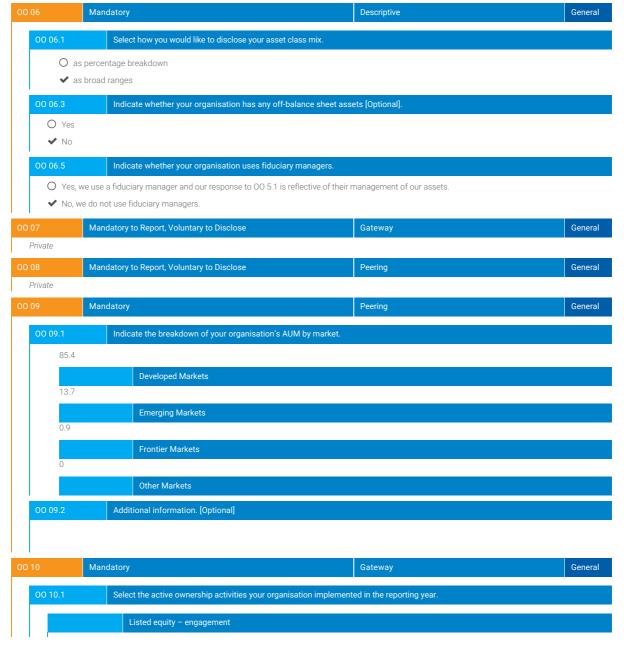

# Usage restrictions

Public Transparency Reports are the intellectual property of PRI. Under no circumstances, can this report or any of its contents be sold to third parties.

#### External equity and fixed income investments

selection, appointment and monitoring processes.

External equity and fixed income investments are managed by external asset managers. External asset management may be broken down into three distinct stages: the search for the new asset managers, the monitoring of the selected asset managers in the portfolio, and the monitoring of the underlying securities in the portfolio. The responsible investment perspective is factored in throughout these three stages.

The search for the new asset managers includes an assessment of the candidates from the responsible investment perspective.

The first stage, i.e. request for proposal (RFP) stage addresses asset managers' responsible investment policies, which in turn acts as a starting point for the further dialogue. Most of the selected asset managers have in place a responsible investment policy and corresponding processes. The following areas, among others, are observed: how the asset manager integrates ESG criteria into their analysis and investment decisions, how responsibility is addressed at the corporate meetings, and whether the asset manager has signed PRI or intends to do so.

The second stage involves regular monitoring of the selected asset managers. An annual ESG survey is sent out to all external equity and fixed income asset managers in the portfolio. The survey addresses asset managers' responsible investment policies as well as their stance towards ESG-related risks and opportunities from the long-term return viewpoint.

The third stage, i.e. monitoring of the underlying securities, entails both ESG analysis and dialogue with the asset managers. In ESG analysis, responsibility indicators can be used for relative analysis (such as comparisons with a geographic dimension) as well as for examining individual investments in absolute terms. The portfolio managers in the external equity and fixed income investments unit regularly address responsibility issues in their dialogue with the asset managers.

Keva aims to enhance its active ownership mechanisms in the external equity and fixed income investments by working in close collaboration with the other investors and by using external service providers.

#### Alternative Investments

The alternative investments unit manages Keva's private equity, real estate, infrastructure and hedge fund investments. In all of these asset classes, the emphasis is on the assessment of the fund manager/management company from the responsibility perspective and in ongoing engagement during the term of the investment.

#### Private equity investments

During the investment process the ESG criteria and/or the requirement of compliance with UN PRI is included in the process description, DDQ documentation, the fund description and in the legal due diligence documentation. In respect of major holdings, ongoing engagement is sought during the term of the investment through advisory board seats. An ESG survey of the largest funds' management companies is conducted annually.

#### Real estate fund investments

The same principles largely apply to real estate fund investments as to private equity funds. The ESG policy of both the asset manager and the fund is reviewed in the context of new investments. Specific topics addressed with asset managers, by means of examples, include energy efficiency requirements and environmental aspects. With regard to funds held in the portfolio, advisory board seats allow responsibility issues to be raised as and when necessary.

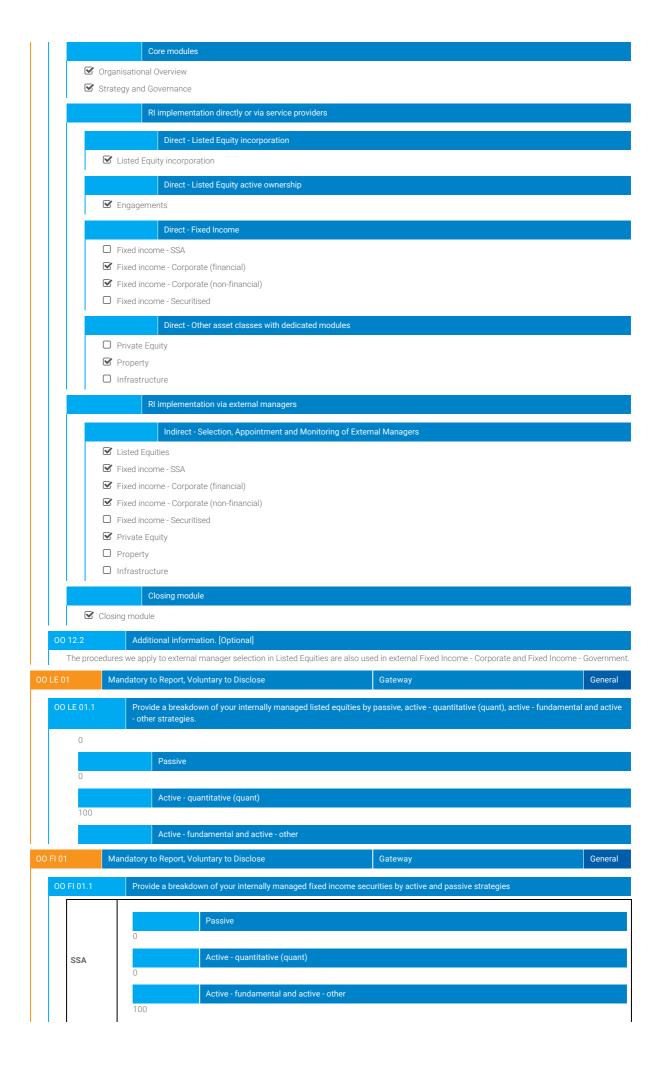

#### Infrastructure investments

The same principles apply to infrastructure investments as to private equity fund investments. The ESG policy of the fund is reviewed when reviewing new investment opportunities and environmental considerations are in particular discussed with the fund manager. Advisory board seats are taken in infrastructure funds as well and are a good way to engage with the fund manager.

#### Hedge fund investments

In hedge fund investments, the responsibility assessment focuses mainly on the asset manager.

In the internal management, access to personnel ownership information of the people who are responsible for investment decisions is available on the website (code of conduct).

O No Private Mandatory Gateway/Core Assessed Indicate if and how frequently your organisation sets and reviews objectives for its responsible investment activities ✓ Ouarterly or more frequently O Biannually O Annually O Less frequently than annually O Ad-hoc basis O It is not set/reviewed Additional information. [Optional] The Board of Directors decides the long-term policy of Keva's investment operation and accepts the guidence documents. The principal guidance documents, Investment Beliefs and the Responsible Investment Beliefs determine this policy. Development of the responsible investment strategy and processes are reported to the Board of Directors twice a year. The Responsible Investment Steering Group drives the practical development of responsible investing. The Steering Group is composed of a representative from each of Keva's investment units. The head of responsible investment convenes the Steering Group. The group makes development proposals to investment units and to the chief investment officer, disseminates information internally, is responsible for Keva's annual UN PRI reporting and prepares and presents questions relating to responsible investing to the chief investment officer for decisions. Responsible Investment Beliefs (https://www.keva.fi/globalassets/2-tiedostot/tama-on-keva--tiedostot/sijoitukset-talous-ja-raportointi/responsible-investment-beliefs.pdf The high-level targets are set in the document "Responsible Investment by asset class". These objectives are reveiwed less frequently than annually, https://www.keva.fi/globalassets/2-tiedostot/tama-on-keva--tiedostot/sijoitukset-talous-ja-raportointi/responsible-investment-by-asset-class.pdfThe shorter-term objectives are decided in the meetings of the Responsible Investment Steering Group, based on the state of the overall development. Referring to the question SG05.1, whilst the objectives are set on a 3-5 year horizon, they are reviewed all the time as the project moves forward. The objectives are updated as the project moves forward and the targets are reached. Private General Indicate the internal and/or external roles used by your organisation, and indicate for each whether they have oversight and/or implementation responsibilities for responsible investment Roles ■ Board members or trustees

External FI Investments & External Equity Investments: The selection process involves both investment due diligence and operational due diligence. The latter is conducted by an external party. Investment due diligence includes both quantitative assessment (such as holdings and returns-based

analysis) as well as qualitative assessment. Asset manager meetings with an in-depth go-through of the investment cases and the underlying investment philosophy are important part of the qualitative assessment - and also the stage where ESG integration into investment analysis and decision-making, and the financial materiality impact of these decisions, is especially addressed during the selection process. Private Equity ESG is discussed during the due diligence sessions with the general partner. The most relevant aspects of ESG are discussed for the sectors that the manager is investing in. ESG policies are discussed both on portfolio company level and on the management company level. We encourage the manager to further develop and allocate resources to ESG where needed.

☐ No actions are taken if any of the ESG requirements are not met Mandatory When monitoring managers, indicate which of the following active ownership information your organisation typically reviews and evaluates from the investment manager in meetings/calls (Proxy) voting LE  $f oldsymbol{arphi}$  Report on voting undertaken (with outcomes and examples) - LE Report on voting undertaken (with outcomes and examples) Report on voting decisions taken ☐ Report on voting decisions taken - LE Adherence with the agreed upon voting policy ☐ Adherence with the agreed upon voting policy - LE Other RI considerations relating to (proxy) voting in investment Other RI considerations relating to (proxy) voting in investment management agreements; specify management agreements; specify - LE None of the above ☐ None of the above - LE For the listed equities for which you have given your external managers a (proxy) voting mandate, indicate the approximate percentage (+/- 5%) of votes that were cast during the reporting year ✓ Votes cast (to the nearest 5%) 95% Specify the basis on which this percentage is calculated. Of the total number of ballot items on which they could have issued instructions ◆ Of the total number of company meetings at which they could have voted  $\ensuremath{\mathsf{O}}$  Of the total value of your listed equity holdings on which they could have voted ☐ We do not collect this information. PRI 1 Descriptive Private Mandatory PRI 1,6 Provide examples of how ESG issues have been addressed in the manager selection, appointment and/or monitoring process for your organisation during the reporting year. ✓ Add Example 1 Topic or Building a global sustainable equity portfolio issue Conducted Internal staff Asset Listed Equity class The external equity team conducted a search to build our first global, sustainability-themed, portfolio. The process was similar to our normal manager selection process, but an additional requirement for the managers chosen was that they need to be thought Scope and leaders in ESG thinking and their ESG integration efforts must compass all of the manager's investment strategies. Futher, the aim process of the portfolio is to address global sustainability issues (as guided by UN SDGs) in addition to our normal financial return target (which we are not compromising). As a result of this search, the team recommended investments in three new strategies. Two of them are impact investing strategies, Outcomes and the third is a strategy with a focus on goal-oriented engagements and sustainable business models. The strategies were funded in O1(20) Add Example 2 Topic or Passive manager selection and passive ESG investments issue Conducted Internal staff Asset Listed Equity class The external equity team conducted a search for passive equity exposure provider. In addition to price, a key criteria was candidates' ESG intergration and active ownership practises. We used an external consultant's assessment as a basis for this, and Scope and chose the candidate with the highest rating. In connection with the change of our passive equity asset manager, we invested in two process passive ESG mandates. These are benchmarked against an established ESG index.

	Outcomes	Search was concluded and investments were made in 2019.
<b>☑</b> Ad	ld Example 3	

Topic or issue	Establishing a new quarterly reporting template
Conducted by	Internal staff
Asset class	Listed Equity
Scope and process	We created a quarterly reporting template that aims to reflect our stance as a long-term investor and partner to our managers. With our template, we are gathering information not only on the external portfolios' performance, but on characteristics, such as turnover and number of holdings. It also includes a section on portfolio financials, or "portfolio as a company". Further, we emphasized to our managers that their quarterly comments should focus on developments, processes and events during the quarter that influence long term value creation, instead of merely commenting on short-term price movements. We also included an ESG/engagements section that specifically asks managers to report on their interactions with company management; what were the issues raised, were they E, S or G related, what methods were used, who was the counterparty and what was the outcome. Finally, some firm level KPIs are included as well.
Outcomes	The template has been reviewed and agreed with almost all of our managers. Simultaneously, we asked our managers to discontinue monthly reporting.

### ☑ Add Example 4

Topic or issue	Engagement and Voting Survey
Conducted by	Internal staff
Asset class	All asset classes
Scope and process	Every year external equity and fixed income investment teams conduct an ESG Survey which is targeted to Keva's external asset managers. For now two years in a row, we have focused on our asset managers' deliberate and goal-oriented influence on their portfolio companies - either through voting or engagement practices - in the pursuit of long-term value creation  Altogether, 61 of our external equity and fixed income managers participated in the survey this time.
Outcomes	The results revealed a very active use of various active ownership methods among our external asset managers. Voting activity was again very high; most managers voted in close to a 100% of cases. Over three quarters of our asset managers were involved in discussions and meetings with companies or in the engagement projects. Over half of the managers collaborated with other investors.  Various more granular level metrics were collected from both voting and engagement activity, such as utilisation of proxy advisor, votes cast for or against, top voting themes, geographical split of general meetings participated, method, lenght and outcomes of engagements undertaken as well as most common engagement themes and their respective sector biases.  In addition, for the first time, we asked specific questions about collaborations and global frameworks, and plan to follow their acceptance as well going forward.

#### ☑ Add Example 5

Topic or issue	Review of specific investments and their potential RI concerns
Conducted by	Internal staff
Asset class	Private equity
Scope and process	As part of our monitoring of portfolio investments, PE team members conducted a review of certain investments of GP's. We wanted to make sure that the manager was acting in an ethical manner and that it's practices were up the standard we expect from them.
Outcomes	We had several productive discussions with the manager as well as with other investors. No changes were deemed necessary.

		g 2019 with 1) the new strategy leading to a significantly more concentrated portfolio than earlier enabling a more realistic starting
		r, given the limited resources 2) a standardization of both the company and the engagement frameworks (discussed above) 3) a xy-voting platform, setting up appropriate processes and placing the first votes during H1 2020. A more strategic explanation of th
	is provided in	

Active ownership and dialogue create an enabling environment to influence entities we invest in. In this case, there will also be a wider benefit from the operation for communities, the environment and financially via the more sustainable practices of the entity invested in.

In 2018, Keva become a member of IIGCC. One target of the membership is to improve our ability to engage with the companies with regards to climate. In 2019, Keva became a member of Climate Action 100+

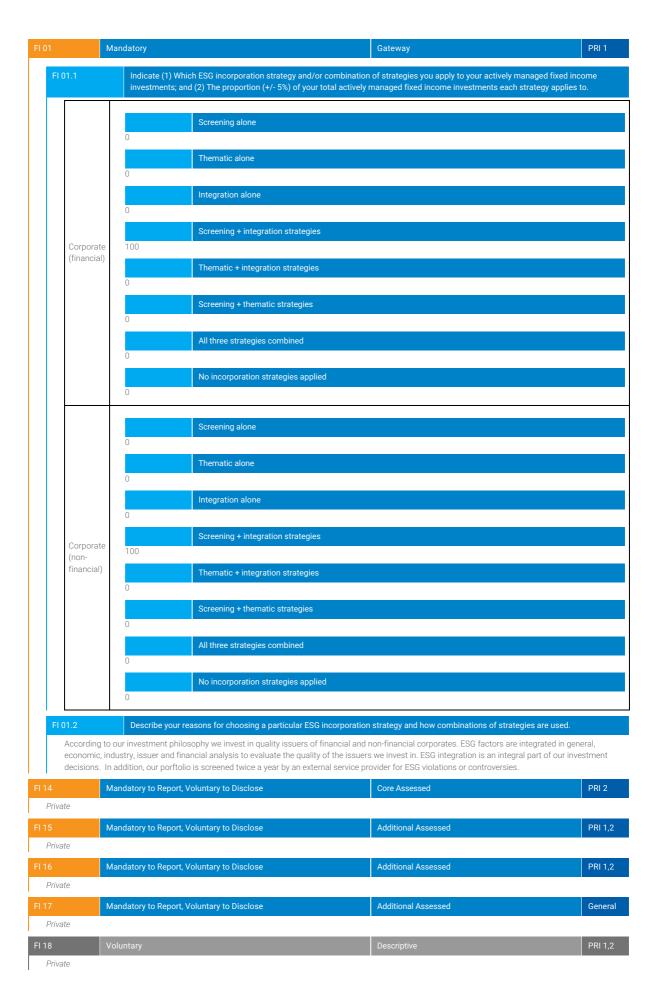

A strategic-level description of our thinking in responsible investments in general and active ownership in particular can be found in

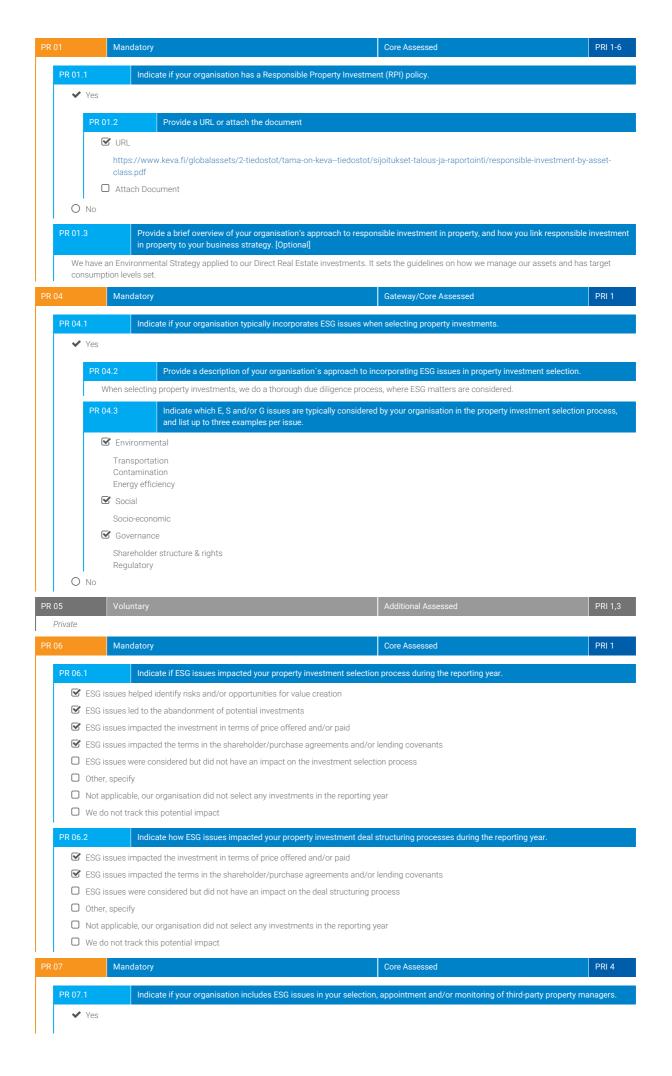

https://www.keva.fi/globalassets/2-tiedostot/tama-on-keva-tiedostot/sijoitukset-talous-ja-raportointi/responsible-investment-beliefs.pdf

## Mandatory Core Assessed PRI 1,2,3 Indicate the method of engagement, giving reasons for the interaction. Type of engagement Reason for interaction To influence corporate practice (or identify the need to influence it) on ESG issues ▼ To encourage improved/increased ESG disclosure Individual / Internal staff engagements ☐ To gain an understanding of ESG strategy and/or management $\ \square$ We do not engage via internal staff ☑ To influence corporate practice (or identify the need to influence it) on ESG issues ▼ To encourage improved/increased ESG disclosure Collaborative engagements ☐ To gain an understanding of ESG strategy and/or management ☐ We do not engage via collaborative engagements ☐ To influence corporate practice (or identify the need to influence it) on ESG issues ☐ To encourage improved/increased ESG disclosure Service provider engagements $\ \square$ To gain an understanding of ESG strategy and/or management ■ We do not engage via service providers Keva has for many years now been involved in promoting companies' awareness and reporting of their environmental impacts through CDP. Long-term advocacy in our investments continues as Keva deepens its engagement in the programme this summer In 2018. Keya was involved in influencing, mainly in association with climate change, in the major polluters in which it is an owner. In 2019, Keya broadened its advocacy and included not only companies of relevance to climate change, but was appealing also to companies whose business entails risks associated with forests and water resources. In 2019, we're involved in requesting a total of 34 companies to report on climate change as well as on their use of water and forest resources. We broadened advocacy to encompass companies also outside our investment portfolio. In addition, Keva, along with more than 450 other global investors, has issued an appeal to G20 leaders calling for action against climate change. Furthermore, Keva has become a member of the largest group of investors working to stop climate change, the Institutional Investor Group on Climate Change (IIGCC), and has now also signed the global Climate Action 100+ initiative. The initiative aims to influence the world's 100 largest corporate greenhouse gas emitters, which account for two thirds of annual global industrial emissions. Indicate whether your organisation has a formal process for identifying and prioritising engagements. O Yes ✓ No Additional information. [Optional] We have an on-going project to generate more formal engagement priorities. Mandatory Indicate whether you define specific objectives for your organisation's engagement activities. O All engagement activities O Majority of engagement activities Individual / Internal staff engagements $\begin{tabular}{ll} O & We do not define specific objectives for engagement activities carried out by internal staff \\ \end{tabular}$ ✓ All engagement activities O Majority of engagement activities Collaborative engagements O Minority of engagement activities O We do not define specific objectives for engagement activities carried out through collaboration Additional information. [Optional] Through the on-going engagement prioritization project, the objectives will improve.
